

Case Study

Mobility

IOS & Android Apps: **STProperty – The Strait Times**

Overview

The Straits Times is an English-language daily broadsheet newspaper based in Singapore owned by Singapore Press Holdings.

Requirements

Client had a Property Division which was focusing on listing of Rental & Sale Properties in & around Singapore. Application was planned with various features with a detailed road map for many years.

Solution

EvvoMobility's Consulting Engagement involved working with the customer on their Design Inputs & delivering the end Application.

- Searching properties based on property types, applying filters on the search result.
- Favouriting a set of properties & also placing an Enquiry of these properties to the listing agent
- Logged in & Guest User version of the app along with Property News & featured listing of properties.
- Universal App which included Android Phones & Tab and also iPhones & iPad apps were developed for a wider Target Audience.

Technologies Used

- Database: **MS SQL**
- Backend: **Rest APIs**
- Frontend Apps: **Native Core IOS & Native Core Android**
- UI/UX: **As per Client Requirement.**
